EDUCATION

University of North Florida *Aug 2026 - Expected May 2028*
Computer Science Bachelor of Science Jacksonville, FL
- Relevant Coursework: Programming II, Linear Algebra, Computational Structures

Miami Dade College *Aug 2024 - May 2026*
Computer Science Associate's Degree | **GPA**: 3.56 Miami, FL
- Relevant Coursework: iOS Mobile Development, Object-Oriented Programming, Calculus II, Physics II

SKILLS

Programming Languages: TypeScript, JavaScript, Python, Java, HTML/CSS, SQL
Frameworks & Libraries: React, Next.js, Node.js, Django, Spring Boot, Flutter, Tailwind CSS
Developer Tools & Hardware: Git, Docker, InfluxDB, Prometheus, Grafana, ESP32
Languages (Spoken): English (Fluent), Spanish (Fluent)
Certifications: Apple Support Certified Technician (Aug 2026)

PROFESSIONAL EXPERIENCE

Technical Specialist *Jun 2026 - Present*
Apple Inc *Jacksonville, FL*
- Diagnose hardware, software, and network issues across iOS, macOS, and watchOS ecosystems.
- Utilize internal diagnostic tools and interpret crash logs for rapid technical triage.
- Translate complex troubleshooting steps into clear guidance for non-technical customers.

Software Engineer Intern *May 2026 - Jul 2026*
WTRWay World *Miami, FL*
- Engineered Flutter testing suites for iOS to eliminate client-side UI bugs.
- Developed Django and Spring Boot REST APIs to optimize user data handling.
- Integrated Stripe payment logic and account onboarding flows into user pipelines.

Software Engineer Intern *Jun 2025 - Nov 2025*
Hakim AI *Miami, FL*
- Architected responsive web applications using Next.js, TypeScript, and Tailwind CSS.
- Streamlined API integrations to improve overall client-side load performance.
- Refactored component architecture to enhance codebase maintainability and modularity.

Shift Supervisor & Barista Trainer *Jul 2023 - Jun 2026*
Starbucks Corporation *Doral, FL*
- Led and managed shifts to ensure smooth store operations.
- Handled cash management, inventory, and store opening/closing procedures.

PROJECTS

Osprey Racing (UNF Formula SAE) *Aug 2026 – Present*
Telemetry & Data Acquisition Subteam Member *Jacksonville, FL*
- Engineered a live vehicle telemetry pipeline utilizing an ESP32 WROVER microcontroller to stream real-time sensor data over Bluetooth.
- Integrated time-series data storage using InfluxDB and Prometheus, feeding metrics into custom Grafana dashboards for low-latency driver performance analysis and suspension diagnostics.
- Modeled custom track geometry in Blender and analyzed vehicle performance logs via MoTeC i2 Pro to support driver-in-the-loop testing.

FlightDeckX | *Three.js, WebGL, UDP Networking, Python/Node*
- Engineered a real-time telemetry and 3D visualization platform using UDP networking for low-latency rendering.
- Developed custom fault injection framework and simulation lifecycle hooks, optimizing rendering performance across complex scenes.

EarthLens | *JavaScript, NASA GIBS API, Geospatial Calculations, CI/CD*
- Integrated NASA GIBS API to render high-resolution temporal imagery comparisons and conduct geospatial calculations.
- Built a responsive interface and automated testing suites backed by a CI/CD pipeline.
